

SUMMARY

Dedicated Full-Stack Software Developer, in love with remote work and pair programming. Experience includes coding, troubleshooting, and testing. I was recognized for my diligent and collaborative working style resulting in 98% on-time project completion.

SKILLS

Front-End: JavaScript, React, Redux, jQuery, HTML5, CSS3, SASS, TypeScript, Tailwind, Bootstrap.
Back-End: MongoDB, PostgreSQL, MySQL, Node, Express, Rest APIs, Linux.
Tools & Methods: Talend, Git, GitHub, Heroku, Netlify, Mobile/Responsive Development, RSpec, TDD.
Professional: Communication, Pair-Programming, Teamwork, Problem Solving, Critical Thinking

EXPERIENCE

TERRITORIO DIGITAL S.A.S
Software Developer - Contract

Bogota, Colombia
August 2022 - present

- Leveraged extensive PHP development skills to complete over 3 of projects/tasks in an enterprise-grade software environment, experiencing a full Software Development Life Cycle (SDLC). Practiced Agile and Scrum methodologies, contributing to a 25% increase in team productivity.
- Created and collaborated with a team of 3 people and enriched existing system metrics by 17%. Increased projected annual revenue by implementing optimized business logic through code.
- Optimized legacy code implementations - accelerated front-end compile time by 20%. Saved up to 1 hour of developer's time every day, using technologies such as Talend, testing, PostgreSQL, and Trello for collaboration.

MICROVERSE
Mentor (Volunteer)

Remote
September 2021 - July 2022

- Mentoring junior web developers, and providing technical support through code reviews.
- Proposing improvements to code organization to improve code quality and overall performance.
- Providing advice and tips on how to maintain motivation to maintain longevity in the program.

HIGHLIGHTED PERSONAL PROJECTS

Remote

Full-Stack Web Developer
Mastered intermediate and advanced topics in full-stack development (including Rails, Git, and DS&A challenges) while building 30+ full-stack projects independently and via pair programming. Some of them are listed below:
RentUrTech

- A scalable e-commerce web application, "RentUrTech", built utilizing React and Ruby on Rails. This application provides a template for businesses to manage and reserve products for customers for specific periods. It enables user account creation, login, and product viewing. An additional administration feature allows business owners to manage their product offerings.
[Live version](#) [Source Code](#)

Building

- A robust full-stack application that enables users to create and manage property listings. Once logged in, users are directed to a dashboard displaying property metadata. The application allows the sorting and filtering of properties based on price or name for enhanced usability.

EDUCATION

MICROVERSE
Remote Full Stack Web Development Program, Certificate

Remote
2021 -2022

- Spent 1300+ hours mastering algorithms, data structures, and full-stack development while simultaneously developing projects with Ruby, Rails, JavaScript, React, and Redux.
- Developed skills in remote pair programming using GitHub, industry-standard git-flow.
- Managed daily standups to communicate and collaborate with international remote developers
